

Washing unit for shopping trolleys and baskets

* *Problem :*

- Compact and mobile solution for cleaning and sanitizing supermarket trolleys and baskets
- The second version of this machine had to be used by people with disabilities
- The third version of this machine had to respond to productivity problems and had to be adapted to specific requests from different European countries

* *Solution provided by CNSE :*

Trailer of 5 x 2, 50 x 2,00m with single axle mounted on hydraulic (lowerable by 30cm), composed of:

- 2 independent cells for cleaning trolleys and baskets, ready to be equipped
- 1 technical part allowing installation of all electrical and hydraulic installations

CNSE is currently working on the 3rd version of this machine, totally autonomous. Improvements such as an integrated tank of 400L, an integrated power generator of 10kW and diesel-powered water and air heating system in order to increase productivity, quality of cleaning and autonomy.
